## Curriculum Vitae

---

### SUMMARY

---

Thoughtful, hardworking, results-driven professional with notable success in a broad range of endeavors as a Geologist, Entrepreneur and IT Professional. Excel at trying new opportunities and applying skills and experience, coupled with perseverance, to successfully complete projects on time.

---

### KEY SKILLS

---

**Technical Background:** Geological and IT background make me an ideal candidate for a Geoscience opportunity

**Communication Skills:** Strong verbal and written skills enable me to work well with peers and management alike

**Organizational Skills:** Proficient at handling multiple tasks and challenges in a fast-paced environment

**Software:** Advanced degree in IT coupled with a web and database development background enables me to quickly adapt to any software tool required

**Other:** Great attitude and happy demeanor make it easy for me to work with people

---

## Employment History

---

### OIL & GAS INDUSTRY

---

**Houston Oil & Minerals/Tenneco Minerals** [Full Time Employee] – CO 6 Years  
**Geologist**

Recruited as an entry-level Geologist to help expand a domestic base and precious metals exploration program. Collaborated with Geologists and Geophysicists to identify potential exploration and drilling targets. Able to work independently on long reconnaissance projects or as part of a team on challenging drilling programs.

**Key Achievements:**

- Designed, planned and budgeted innovative, high-profile, first pass reconnaissance plans throughout North America based on geomodeling of submarine exhalative environments.
- Manage drill ventures in remote challenging environments. Evaluate drill hole data, logged drill core and developed geologic cross sections for reporting and evaluation.
- Developed weekly and annual technical reports evaluating mineral potential, outlined project successes and weaknesses and recommended appropriate solutions with budget adjustments.
- Managed teams of Geoscience personnel in mapping and geosteering drilling ventures in structurally complex geologic environments in challenging geographical and climate conditions.
- Recognized for ability to grasp new concepts quickly and for ability to work hard and persevere in physically challenging situations.
- Hand selected new personnel to build teams to place in various exploration and drilling programs.

**The Bradsby Group** [Full Time Employee] – CO

2006-2010

**Oil & Gas Recruiter**

Upstream and midstream oil and gas recruiter in a \$1M annual revenue division. Part of a very successful team that outperformed many other teams in terms of synergy and revenue generated for the firm. Involved in local events and membership activities that included the Denver Petroleum Club and Society of Petroleum Engineers.

**Key Achievements:**

- Awarded Rookie of the Year award in 2006 as top sales producer.
- Recognized by the Rocky Mountain Association of Recruiters as one of the top producers in Colorado. Inducted into their "Quarter Million Dollar Club".
- Shared my knowledge of geoscience and the Oil & Gas industry with peers to enable them to develop a better rapport with hiring authorities and candidates alike.
- Responsible for sourcing, cold calling, evaluating, selecting and submitting candidates to job orders for USA and Canadian upstream and midstream energy firms.
- Developed a comprehensive Excel database template for tracking candidate and company information and contact events.
- Successfully implemented a unique candidate submission template that received positive accolades from hiring authorities.

---

EDUCATION

**University of Denver**, Denver CO

- Master's Degree, Computer Information Systems

**Metro State University**, Denver CO

- Computer course work, prep for Masters education, Colorado Scholar's Award

**Montana State University**, Bozeman MT

- Bachelors of Science Degree, Geology, Phi Kappa Phi National Honor Society
